

Anas Bashir

Software engineer

anasbashir.com

SUMMARY

Full stack software engineer working in TypeScript, React, Next.js, Node.js and PostgreSQL, from the interface through to deployment on Linux, Docker and nginx. Currently the developer at a marketing agency, building websites and web platforms for its clients. Rebuilt an open-source video clipping tool into a production system that processes hundreds of uploads a day. Comfortable picking up existing codebases in unfamiliar stacks and shipping features in them.

SKILLS

Languages TypeScript · JavaScript · Python · SQL · Bash

Frontend React.js · Next.js · Vue.js · Tailwind CSS

Backend & Data Node.js · PostgreSQL · Prisma · Redis · Django · Laravel · MySQL

Infrastructure & Tooling Docker · Linux · nginx · Git · GitHub Actions

WORK EXPERIENCE

Software Engineer, Otogrow

Remote · Dec 2025 – Present

- Build websites and web platforms for the agency's clients, including travel operators in Mexico, Colombia and Canada and a creative studio in Australia.
- Took over existing Laravel, Vue and Node.js codebases from other developers and shipped client features in them.
- Rebuilt an open-source video prototype into the production system behind the agency's short-form content pipeline, now processing hundreds of uploads a day.

Stack: Node.js, TypeScript, PostgreSQL, Redis, Laravel, Vue.js, Docker, nginx

Full Stack Intern, Hakach Transfert

Ankara, Türkiye · Aug 2025

- Rebuilt hakach.com from scratch in Next.js, replacing an ageing PHP site, in English and French.
- Fixed bugs and added features on the internal Next.js admin used to run the transfer business.
- Continued maintaining and extending the work after the internship ended.

Stack: Next.js, TypeScript, React

Web design intern, Acugence

Doha, Qatar · Jul 2024 – Sep 2024

- Produced wireframes and user flows in Figma and Flowmapp for a waste management platform still at the ideation stage.
- Ran the requirements loop between the founder and a domain expert in environmental systems, and turned it into prototypes.

Stack: Figma, Flowmapp

SELECTED PROJECTS

SleekOS Clips

Client work · Otogrow · Sole engineer · Apr – May 2026

Moved an open-source video clipping tool onto PostgreSQL, Redis-backed job queues and local transcription, so work survives failures and restarts.

Node 22, Postgres, Prisma, Redis, BullMQ, faster-whisper, yt-dlp, Docker, nginx, GitHub Actions

Entorno CIT and Oriente Magico

Client work · Entorno CIT · Oriente Magico Travels · Sole engineer · Dec 2025 – May 2026

Took over two diverged Laravel and Vue travel platforms for operators in Mexico and Canada, and shipped features across both.

Laravel 12, Blade, Vue 3, MySQL, Docker, Vite
anasbashir.com/work/entorno-oriente

Dunas Travel Latam

Client work · Dunas Travel Latam · Sole engineer · Mar 2026

Built a private travel catalogue in Next.js and PostgreSQL in about a month. Clients sign in with an access key the operator controls.

Next.js, Postgres, Prisma
